

TECHNICAL DATA SHEET BLUAIR

DESCRIPTION

Bluair is a blend of heterogeneous mixed plastics mainly composed of plastic polymers used in reduction process in iron and steel production plants. It's produced and commercialised beneath national technical standard UNI 10667/17.

ASPECT

Colour: multicolour
Shape and size: chosen in agreement between the parties

HANDLING AND STORAGE

Far from heat sources
Away from atmospheric agents
Away from chemical agents

PACKAGING

Bluair is available bulk

PRODUCTION SITE

Via G. Matteotti, 1160 45023 Costa di Rovigo (RO) - Italy

PARAMETER	METHOD	UNIT	VALUE
BULK DENSITY	ASTM D 1895	kg/m ³	> 200
LOWER CALORIFIC VALUE	UNI EN 15400	Mj/kg	> 30
MOISTURE	ASTM D 6980	%	< 10
HETEROGENEOUS PLASTICS CONTENT	UNI 10667/17	%	> 80

TECHNICAL NOTES

The above data represent standard average values that could be subject to fluctuations and do not exempt the customer from accurately verifying the conformity in his working cycle. It will be the customer's responsibility to carry out all technical and regulatory checks to establish the compliance. In any case, I. Blu Srl assumes no responsibility for the uses that the purchaser and end users (or other third parties) intend to make of the material; I. Blu Srl therefore does not guarantee the Buyer neither any particular destination of the material, nor any particular functionality of the same or particular quality that makes it suitable for a certain use. The product must be used for the production of articles in compliance with all the legal requirements, that is to say, it cannot be used to make packaging intended for direct contact with food, unless otherwise specifically permitted by the applicable national law and that the user of the product fully complies with this legislation. The only relevant parameters for assessing product conformity are those stated above in this technical data sheet. The seller declines all responsibility for the Product that has been altered or modified, that has been subjected to unusual stress, abuse, accidents, forces or exposures beyond normal use or normal operating or environmental parameters, or that has been subjected to integration, combination or connection with other products, materials and / or energies. Under no circumstances the seller will be liable for indirect damages, including - but not limited to - loss of profits or revenues, loss of business, damage to third parties, cost of capital, cost of replacement products or equipment.
